SUMMARY

Dynamic and results-driven **Software Engineer** with hands-on experience delivering full-stack solutions across a wide range of technologies and programming languages. Skilled in front-end and back-end development, web design, and UI/UX prototyping using tools like Figma and GitHub. Known for a strong passion for continuous learning, a disciplined work ethic, and a detail-oriented approach to problem-solving. Proven ability to adapt quickly, contribute effectively in collaborative environments, and deliver high-quality, scalable code tailored to diverse project requirements.

BACKGROUND

Certified Personal Trainer and Health Coach with over 12 years of experience, including successfully running my own fitness and wellness business. Specializing in personalized training programs, nutrition coaching, and sustainable lifestyle change. Known for a client-focused approach, entrepreneurial mindset, and a passion for helping individuals achieve long-term health and fitness goals.

PROJECTS

Weather Card App

React, JavaScript, HTML, CSS

- Built a mobile-first weather app integrating OpenWeather API for real-time forecasts.
- Designed logic to provide outfit suggestions based on current conditions.
- Deployed via GitHub Pages with clean and responsive UI. [GitHub Repo](#)

ToDo App

JavaScript, HTML, CSS

- Developed a task management tool with add/remove and daily tracking functionality.
- Emphasized component-based architecture and clean interface design. [GitHub Repo](#)
